4 & 5 Gang Fixed Powerpoints

Trader's 4 and 5 Gang Fixed Powerpoint Range is another range of Trader switches and sockets ready for use by Australian Electrical Contractors.

Unique to Trader - both the Puma and Cheetah versions have a green back. The Puma has orange dolly's and the Cheetah has green.

We believe our 4 and 5 Gang range is an exciting inclusion from Trader. This serves the consumer expectations of Australians that are building or renovating and many other commercial installs. So many jobs need that extra fixed gang power point in Kitchens, Bedrooms, Offices, Entertainment Areas and Workshops.

The Four Gang (CHBIG4 or PUBIG4) most certainly does the job and is what we are all familiar with, however we hear so often a Five Gang (CHBIG5 or PUBIG5) would be even better, this is why:

Kitchen – Oven, Toaster, Kettle, Thermomix, Phone Charger

Bedroom – Clock Radio, Phone Charger, Electric Blanket, Two Lamps

Living Room – Television, DVD Player, MP3 Player, PlayStation, Sound Bar

Office – Computer, Printer, Fax Machine, Phone Charger, Lamp

Workshop – Power Drill, Computer, Phone charger, Bar Fridge, Stereo

Compatible Accessories

Trader Mounting Blocks work a treat for installations where surface mounting is required in a retrofit. Conduit or duct is compatible with the backing plate where additional safety is required on conducting surfaces.

Trader is 4 and 5 Gang Ready!

- Double pole surface mounted switched power point
- 10A at 250V ~
- Diameter 6mm terminal bores to suit 4 x 2.5 mm cables
- Fits 84 mm mounting centres
- Has polycarbonate cover so it won't turn yellow at a different rate to the socket faces
- Approved to AS/NZS3112
